SKILLS

- C#
- Python
- JavaScript, TypeScript
- React, Vite
- HTML, CSS
- SQL & MSSQL
- Swift (Basic)
- .NET, WPF
- Unity
- Git, CI/CD
- REST APIs
- Unit Testing
- Artificial Intelligence (AI)

PROFILE

Versatile Software Developer with 3 years of professional experience and over 6 years of programming background. Proven track record across full-stack web development, AI model optimization, and game architecture. Highly proficient in Python, C# (.NET), JavaScript/TypeScript, React, and Unity. Passionate about clean code, scalable back-end systems, rigorous software testing, and agile methodologies, looking to bring robust problem-solving skills to an innovative engineering team.

EXPERIENCE

AI Data Trainer (Coding) | Alignerr

MARCH 2025 - PRESENT

- Evaluated, optimized, and tested complex AI-generated software solutions across Python, JavaScript, and TypeScript to ensure enterprise-level code quality.
- Conducted rigorous code reviews, troubleshooting edge cases and debugging logic to produce secure, maintainable code.
- Supported the creation and execution of quality rubrics to ensure software reliability, safety, and model alignment.

Independent Game Developer | Meter Games

2020 – PRESENT

- Managed the full software development lifecycle for multiple published applications, utilizing C# and Agile-inspired methodologies.
- Architected scalable back-end infrastructure, including persistent databases, game economies, and complex front-end UI components.
- Designed and developed internal software tools to automate workflows, reducing manual content generation time by ~90%.

AI Data Trainer (Coding) | DataAnnotation

SEPTEMBER 2023 – MARCH 2025

- Conducted rigorous code reviews and tested software outputs for correctness, safety, and algorithm efficiency.
- Authored high-quality, validated technical solutions for diverse programming challenges, enforcing clean code architecture in C# and Python.

LANGUAGES

English

French

Bulgarian

Spanish

HOBBIES

Kyokushin Karate (13+ years of continuous training & mentorship)

EDUCATION

Computer Science DEC |
John Abbott College
AUGUST 2024 – MAY 2027

Computer Technician | Techni-Connection

AUGUST 2022

- Diagnosed and resolved complex hardware and software issues, optimizing system performance for local IT infrastructure.
- Provided hands-on technical support and communicated effectively with end-users to troubleshoot critical systems and minimize downtime.

Day Camp Counselor | Ville de L'Île-Perrot

JUNE 2023 – AUGUST 2023

- Supervised and led group activities, demonstrating strong leadership, responsibility, and communication in a fast-paced team setting.

PROJECTS

Pit Wall (F1 Data Dashboard) | *React, TypeScript, Vite, API*

NOVEMBER 2025 – PRESENT

- Built data pipelines to pull together complex data from multiple REST API sources, fetching real-time Formula 1 statistics.
- Created a dynamic, easy-to-navigate dashboard to visualize key performance metrics for seasons, races, and drivers using modular React components.
- Managed asynchronous data requests and optimized API routing logic to provide a highly responsive, user-friendly web interface, utilizing TypeScript for strict type safety and data validation.

StudySnap | *C#, WPF, AI Integration*

NOVEMBER 2025 – PRESENT

- Developed a Windows desktop application using WPF and JSON persistence for creating and managing interactive data decks.
- Implemented an AI-powered generation pipeline that parses uploaded documents (PDF, DOCX) to automatically create content.

Parker | *Unity, C#, Analytics*

JANUARY 2021 – PRESENT

- Solo-developed a PC simulation featuring 45 vehicles, complex physics, and a persistent economy.
- Built custom editor tools to procedurally generate level layouts, automating the placement of obstacles, start/end points, and logic.
- Integrated gameplay analytics to monitor user progression and balance difficulty.
